

Sprint Planning Templates

Capacity calculator, sprint goal and backlog, planning agenda, story splitting, definition of done, review and retrospective

1. Sprint capacity calculator

Sprint	
Length (working days)	10
Focus factor	Share of a day on sprint work, typically 0.6 to 0.8

Team member	Days available	Hours per day	Focus factor	Capacity (hours)	Notes (leave, support, meetings)

Total capacity (hours)	
Average velocity (points)	
Commitment target (points)	Velocity, adjusted for capacity vs a normal sprint

2. Sprint goal and backlog

Sprint goal	One sentence: what the sprint achieves and for whom
Dates	
Capacity (points)	

Rank	Story	Points	Owner	Ready? (criteria, size, no blockers)	Committed?

Rank	Story	Points	Owner	Ready? (criteria, size, no blockers)	Committed?

3. Sprint planning meeting agenda

Item	Minutes	Owner
Review sprint goal proposed by product owner	10	Product owner
Confirm capacity (leave, support, meetings)	10	Scrum master
Walk the top of the backlog; clarify and size	40	Team
Select stories to capacity; confirm the goal still holds	20	Team
Break stories into tasks (optional, part two)	40	Team
Confirm commitment and risks	10	All

4. Story splitting worksheet

Story	
Why it is too big	More than a sprint, unclear, several acceptance criteria

Split by	Resulting story	Points	Keep in sprint?
Workflow step			
Business rule			
Data variation			
Interface or platform			
Happy path first, exceptions later			
Spike (research) then build			

5. Definition of done

- Acceptance criteria met and demonstrated
- Code reviewed by someone other than the author
- Unit and integration tests written and passing
- Documentation updated
- No open severity 1 or 2 defects
- Deployed to the test or staging environment
- Product owner accepted

6. Sprint review agenda

Item	Minutes
Sprint goal and what was completed	5
Demonstration of each done story	30
Stakeholder feedback and questions	15
Backlog changes arising	10

7. Sprint retrospective

Went well	Did not	Try next sprint

Action	Owner	Due
